DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 9/11/02 has been entered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

3. Claim 1 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Hustad et al. or Simonsen.

4. Claims 1 and 2 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Van Erden '857.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Thomas et al.

Thomas et al. discloses the claimed invention except for the wall segments 36, 38 being formed from the walls 12, 14. It would have been obvious to one having ordinary skill in the art at the time the invention was made to form the wall segments of Thomas et al. from the walls, since it has been held that forming in one piece an article which has formerly been formed in two pieces and put together involves only routine skill in the art. *Howard v. Detroit Stove Works*, 150 U.S. 164 (1893).

7. Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ausnit '369 in view of Thomas et al.

Ausnit '369 discloses the claimed invention except that Ausnit '369 shows the slider being accessed by tearing lines of weakening in the wall segments instead of peeling the wall segments apart. Thomas et al. shows that peeling analogous wall

segments apart from one another to access the slider is an equivalent structure known in the art. Therefore, because these two slider accessing means were art-recognized equivalents at the time the invention was made, one of ordinary skill in the art would have found it obvious to substitute a peel seal for lines of weakening.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
